

Technical Skills

Business Intelligence

- Qlik Sense (Admin, Dev, Optimization)
- Data Modeling & Performance Tuning
- ETL / ELT Pipeline Design

Data & Analytics Engineering

- SQL (Snowflake, Oracle, PostgreSQL, MSSQL)
- dbt Core (Transformation, Documentation)
- REST API Integration
- Python

Experience

Senior BI Developer | Nov 2023 – Present

Arelion Hungary Kft. (formerly Telia Carrier) – Software & Data Engineering

- Shipped the first generative AI tool to production: a knowledge assistant trained on the Sales Runbook, plus a live, feedback-driven document health report that enabled stakeholders to halve average document age; delivered with evaluation testing and phased rollout
- Led migration of 400+ reports from on-premise to Qlik Cloud, coordinating IT, Legal, and Business units to deliver significant license and infrastructure cost reductions; implemented automated cleanup reducing inactive apps by 75%
- Built IP-whitelisted Data Gateway (20+ data sources) and automated app versioning to GitHub, closing the platform's native backup gap while enabling developer self-service code review and eliminating Support dependency
- Reduced Qlik-driven Snowflake credits by >50% via task scheduling, usage analysis, and AUTOSUSPEND optimization; added QUERY_TAG tracing to attribute queries to app owners, enabling targeted refactoring; extended cost monitoring to Cortex AI functions ahead of adoption
- Developed dbt models in Snowflake for automated data transformations, serving as the single source of truth for Network Operations units (IP Migration, DWDM Planning)

BI Developer | Jul 2017 – Nov 2023

Telia Carrier Hungary Kft. (formerly TeliaSonera) – IT & Engineering

- Transformed BI infrastructure by implementing new access controls, governance framework and new data connections that increased platform adoption by 67%
- Led migration of 300+ BI reports during corporate divestiture, refactoring SQL queries to Snowflake while maintaining business continuity
- Provided technical support and knowledge sharing for 30+ Qlik developers across international teams via structured sessions and 1:1 coaching
- Developed operational and forecasting dashboards for Voice, Finance, Sales, and Network Operations

Data Analyst | Oct 2015 – Jul 2017

TeliaSonera International Carrier Hungaria Kft. – Networks Operations, Data Quality Team

- Analyzed DDoS cyberattacks and network vulnerabilities using Python for threat assessment
- Developed data quality, asset and risk reports for Finance and Networks Operations
- Conducted network equipment audits in major European data centers across 6 countries

Education

Master of Science in Geography and Geoinformatics

University of Debrecen

Advanced Workshops

- Masters Summit for Qlik – Vienna, 2024

Certificates

- Qlik Sense Data Architect
- Professional Scrum Master (PSM I)
